

Chapter 1

Networking Fundamentals

This chapter provides an overview of basic networking concepts, including network architecture, design, and project management.

Table of Contents

Introduction to Networking Fundamentals.....	1-1
Overview	1-1
Networking History and Evolution	1-2
Overview	1-2
Mainframe Terminals	1-3
Minicomputer Terminals	1-4
Personal Computing Devices	1-5
Open Systems Interconnection (OSI) Reference Model.....	1-6
Overview	1-6
Layers	1-6
Layer 7 (Application) Services	1-9
Layer 6 (Presentation) Services	1-9
Layer 5 (Session) Services	1-9
Layer 4 (Transport) Services	1-9
Layer 3 (Network) Services	1-9
Layer 2 (Data Link) Services	1-9
Layer 1 (Physical) Services	1-9
Message Transfer Sequence.....	1-10
Introduction to Network Architecture and Design	1-17
Overview	1-17
Types of Networks.....	1-19
Personal Area Networks (PANs)	1-19
Local Area Networks (LANs)	1-20
Campus Area Networks (CANs)	1-21
Metropolitan Area Networks (MANs)	1-22
Wide Area Networks (WANs)	1-23
Types of Messaging	1-24
Unicast Messaging	1-24
Broadcast Messaging	1-27
Multicast Messaging	1-28

Types of Addressing	1-29
Local Area Network (LAN) Addressing	1-29
Internetwork Addressing	1-30
Message Transfer Using Addressing	1-33
Network Architecture Standards.....	1-38
IEEE Standards.....	1-38
Internet Engineering Task Force (IETF) Standards	1-40
Network Design	1-41
Functional Design Process	1-41
Physical Design Process	1-42
Project Management.....	1-43
Overview	1-43
Human Resources Management	1-44
Scope Management	1-44
Integration Management	1-44
Time Management.....	1-44
Cost Management	1-44
Quality Management.....	1-44
Communications Management.....	1-45
Risk Management.....	1-45
Procurement Management.....	1-45
Specifications Writing.....	1-46
Overview	1-46
MasterFormat™ 2004—Numbering Revision	1-47
MasterFormat™ 2004 Division Number Changes Affecting Information Transport	1-49
References	1-50
