

# **MacOS X for ITSS**

## **Short Course**

**James Partridge**

**OUCS**

**9 June 2004**

# 1. Introduction

- Background
- Goals of the course

“It makes me very happy to hear that you are as well a happy Mac user! For some reasons I got the impression that whole Oxford University is based on ‘poor’ PC’s, bearing in mind when I showed my Macintosh upon arrival to Oxford to [*IT Officer A*] and [*IT Officer B*] here at [*Unit*], they were loudly laughing at me and shaking their head off...”

# We will...

- Describe layout of OS X file system
- Look at how to maintain healthy OS
- Look at installing & configuring common apps
- Discuss typical sw & hw problems
- Discuss solutions to typical problems

# We won't...

- Get much actual hands-on (sadly) because of equipment restrictions
- Spend time discussing the apps themselves
- Rerun the "Intro to OS X" course going on next door
- Talk about OS9
- Be doing an advanced MacOS X user course
