Course Description	1
What is a Query?	2
Filters	3
Limitations of Filters	3
Types of Filters	3
Notes on Filters	3
Activity 1: Creating and Using Filters	4
Queries	5
Why Use Queries?	5
Types of Queries	5
Creating a Query	6
Query Wizard.....	6
Using Design View to Create Queries	7
Select a data source.....	7
Query By Example Window	7
Selecting Fields	8
Query Views	9
Activity 2: Create a Simple Query	9
Query Utilities	10
Rearranging, Inserting, or Deleting Fields	10
Specifying Sort Order	10
Excluding Fields from the Dynaset	10
Specifying Criteria	10
Combining Selection Criteria	11
Viewing the Resulting Dynaset.....	11
Saving the Query.....	11
Printing Query Results.....	12
Activity 3: Combining Criteria in a Single Field	12
Activity 4: Combining Criteria using Multiple Fields	12
Activity 5: Creating a Multi-table Query.....	13

Calculations	14
Expression Rules.....	14
Activity 6: Performing Calculations in a new Field	14
Grouping Records	15
Functions Available	15
Activity 7: Grouping CreditHours into a Total.....	16
Parameter query.....	17
Activity 8: Parameter Query	17
Query Properties.....	18
Crosstab Query	18
Action Queries	19
Activity 9: Make an Update Query.....	20
Saving Query Results in a Table	20
Activity 10: Make Table Query	21
Find Duplicates Query.....	21

Course Description

This is the third in a series of six workshops about Microsoft Access. It deals specifically with queries, plus some information about filters.

Many databases contain large, varied amounts of information. There are times when you will need to narrow the focus of the information in the database or combine information from multiple tables. This is done through the use of queries. Queries allow you to view, change, and analyze data in different ways. You can also use them as a source of records for forms and reports.

The purpose of this session is to familiarize you with some of the different types of queries and how they can be used. Our goal is to assist you to learn the software, understand some basic concepts and show you some tips and techniques so you can develop your database management/programming skills over time.

The six Access workshops are:

- Introduction to Access
- Access Database Design
- Access Queries
- Access Reports
- Access Form Design
- Access Macros and Database Utilities

Thank you,

The OIT Technical Support Services Trainers
