

INTRO TO JQUERY

CLASS 1

SLIDES AVAILABLE AT:

[HTTP://ALEXISGO.GITHUB.IO/JQUERY-INTRO/](http://ALEXISGO.GITHUB.IO/JQUERY-INTRO/)

WELCOME!

Girl Develop It is here to provide affordable and accessible programs to learn software through mentorship and hands-on instruction.

Some "rules"

- We are here for you!
- Every question is important
- Help each other
- Have fun

WHAT IS JQUERY?

jQuery is a **library** of JavaScript functions. It contains many functions to help simplify your programming, including:

- HTML element selection & manipulation
- CSS manipulation
- HTML events
- JavaScript effects and animations

WHAT IS A LIBRARY?

- Software libraries hold **functions**
 - functions are like a collection of helpful code you want to run again & again
- When you include a library, you can use all the functions in that library
- That means: **you get to take advantage of other people's experience!**
- And... **Save time!**
