Wikibooks.org

March 15, 2013

On the 28th of April 2012 the contents of the English as well as German Wikibooks and Wikipedia projects were licensed under Creative Commons Attribution-ShareAlike 3.0 Unported license. An URI to this license is given in the list of figures on page 81. If this document is a derived work from the contents of one of these projects and the content was still licensed by the project under this license at the time of derivation this document has to be licensed under the same, a similar or a compatible license, as stated in section 4b of the license. The list of contributors is included in chapter Contributors on page 77. The licenses GPL, LGPL and GFDL are included in chapter Licenses on page 85, since this book and/or parts of it may or may not be licensed under one or more of these licenses, and thus require inclusion of these licenses. The licenses of the figures are given in the list of figures on page 81. This PDF was generated by the L<sup>A</sup>T<sub>E</sub>X typesetting software. The L<sup>A</sup>T<sub>E</sub>X source code is included as an attachment (`source.7z.txt`) in this PDF file. To extract the source from the PDF file, we recommend the use of <http://www.pdflabs.com/tools/pdftk-the-pdf-toolkit/> utility or clicking the paper clip attachment symbol on the lower left of your PDF Viewer, selecting **Save Attachment**. After extracting it from the PDF file you have to rename it to `source.7z`. To uncompress the resulting archive we recommend the use of <http://www.7-zip.org/>. The L<sup>A</sup>T<sub>E</sub>X source itself was generated by a program written by Dirk Hünninger, which is freely available under an open source license from [http://de.wikibooks.org/wiki/Benutzer:Dirk\\_Huenniger/wb2pdf](http://de.wikibooks.org/wiki/Benutzer:Dirk_Huenniger/wb2pdf). This distribution also contains a configured version of the `pdflatex` compiler with all necessary packages and fonts needed to compile the L<sup>A</sup>T<sub>E</sub>X source included in this PDF file.

# Contents

<b>1</b>	<b>Introduction</b>	<b>3</b>
1.1	Prerequisites . . . . .	3
1.2	When is Efficiency Important? . . . . .	4
1.3	Inventing an Algorithm . . . . .	4
1.4	Understanding an Algorithm . . . . .	7
1.5	Overview of the Techniques . . . . .	8
1.6	Algorithm and code example . . . . .	9
<b>2</b>	<b>Mathematical Background</b>	<b>11</b>
2.1	Asymptotic Notation . . . . .	11
2.2	Algorithm Analysis: Solving Recurrence Equations . . . . .	15
2.3	Amortized Analysis . . . . .	17
<b>3</b>	<b>Divide and Conquer</b>	<b>19</b>
3.1	Merge Sort . . . . .	19
3.2	Binary Search . . . . .	22
3.3	Integer Multiplication . . . . .	24
3.4	Base Conversion . . . . .	27
3.5	Closest Pair of Points . . . . .	29
3.6	Closest Pair: A Divide-and-Conquer Approach . . . . .	30
3.7	Towers Of Hanoi Problem . . . . .	32
<b>4</b>	<b>Randomization</b>	<b>35</b>
4.1	Ordered Statistics . . . . .	35
4.2	Quicksort . . . . .	39
4.3	Shuffling an Array . . . . .	40
4.4	Equal Multivariate Polynomials . . . . .	40
4.5	Skip Lists . . . . .	40
4.6	Treaps . . . . .	43
4.7	Derandomization . . . . .	43
4.8	Exercises . . . . .	44
<b>5</b>	<b>Backtracking</b>	<b>45</b>
5.1	Longest Common Subsequence (exhaustive version) . . . . .	45
5.2	Shortest Path Problem (exhaustive version) . . . . .	47
5.3	Largest Independent Set . . . . .	48
5.4	Bounding Searches . . . . .	48
5.5	Constrained 3-Coloring . . . . .	48
5.6	Traveling Salesperson Problem . . . . .	48

---

<b>6</b>	<b>Dynamic Programming</b>	<b>49</b>
6.1	Fibonacci Numbers . . . . .	49
6.2	Longest Common Subsequence (DP version) . . . . .	53
6.3	Matrix Chain Multiplication . . . . .	53
6.4	Parsing Any Context-Free Grammar . . . . .	56
<b>7</b>	<b>Greedy Algorithms</b>	<b>57</b>
7.1	Event Scheduling Problem . . . . .	57
7.2	Dijkstra's Shortest Path Algorithm . . . . .	59
7.3	Minimum spanning tree . . . . .	60
<b>8</b>	<b>Hill Climbing</b>	<b>61</b>
8.1	Newton's Root Finding Method . . . . .	62
8.2	Network Flow . . . . .	63
8.3	The Ford-Fulkerson Algorithm . . . . .	67
8.4	Applications of Network Flow . . . . .	67
<b>9</b>	<b>Ada Implementation</b>	<b>69</b>
9.1	Introduction . . . . .	69
9.2	Chapter 1: Introduction . . . . .	69
9.3	Chapter 6: Dynamic Programming . . . . .	70
<b>10</b>	<b>Contributors</b>	<b>77</b>
	<b>List of Figures</b>	<b>81</b>
<b>11</b>	<b>Licenses</b>	<b>85</b>
11.1	GNU GENERAL PUBLIC LICENSE . . . . .	85
11.2	GNU Free Documentation License . . . . .	86
11.3	GNU Lesser General Public License . . . . .	87
