March 13, 2013

On the 28th of April 2012 the contents of the English as well as German Wikibooks and Wikipedia projects were licensed under Creative Commons Attribution-ShareAlike 3.0 Unported license. An URI to this license is given in the list of figures on page 119. If this document is a derived work from the contents of one of these projects and the content was still licensed by the project under this license at the time of derivation this document has to be licensed under the same, a similar or a compatible license, as stated in section 4b of the license. The list of contributors is included in chapter Contributors on page 115. The licenses GPL, LGPL and GFDL are included in chapter Licenses on page 123, since this book and/or parts of it may or may not be licensed under one or more of these licenses, and thus require inclusion of these licenses. The licenses of the figures are given in the list of figures on page 119. This PDF was generated by the L^AT_EX typesetting software. The L^AT_EX source code is included as an attachment (`source.7z.txt`) in this PDF file. To extract the source from the PDF file, we recommend the use of <http://www.pdfplabs.com/tools/pdftk-the-pdf-toolkit/> utility or clicking the paper clip attachment symbol on the lower left of your PDF Viewer, selecting **Save Attachment**. After extracting it from the PDF file you have to rename it to `source.7z`. To uncompress the resulting archive we recommend the use of <http://www.7-zip.org/>. The L^AT_EX source itself was generated by a program written by Dirk Hünninger, which is freely available under an open source license from http://de.wikibooks.org/wiki/Benutzer:Dirk_Huenniger/wb2pdf. This distribution also contains a configured version of the `pdflatex` compiler with all necessary packages and fonts needed to compile the L^AT_EX source included in this PDF file.

Contents

1	Front matter	3
2	Intro	5
2.1	First things first	5
3	Hello, World	11
4	Who Goes There?	17
5	Count to 10	23
6	Decisions	29
7	Debugging	35
8	Defining Functions	41
9	Advanced Functions Example	49
10	Lists	55
11	For Loops	65
12	Boolean Expressions	69
13	Dictionaries	77
14	Using Modules	83
15	More on Lists	87
16	Revenge of the Strings	91
17	File IO	99
18	Dealing with the imperfect	107
19	The End	111
20	FAQ	113
21	Contributors	115
	List of Figures	119

22 Licenses	123
22.1 GNU GENERAL PUBLIC LICENSE	123
22.2 GNU Free Documentation License	124
22.3 GNU Lesser General Public License	125
