Use this guide to get up and running with Microsoft Office 365 in your organization. All it takes is three easy steps: get started, bring your organization on board, and configure optional settings based on your organization's needs.

1. Getting started

Start using Office 365 without disrupting your current environment. In about an hour, you can:

- > Set up your email and be productive on your desktop, phone, or tablet.
- > Create documents and collaborate online with Office desktop applications, Microsoft SharePoint Online, and Office Online.
- > Run online meetings and communicate with others through Microsoft Lync Online.
