• Check the box next to the one project that you want

to ovport	● ○ ● Export
to export.	Archive file Please enter a destination archive file.
Click on the triangle next to the project to expand the menu (to see all files)	Image: HelloWorld Image: Section S Image: Filter Types Select All Deselect All To archive file: Image: Section S Image: Options Image: Save in zip format Image: Save in zip format
1 September 2015	< Back

Click Browse... to select a location (e.g., Desktop) and 000 a filename for Export Archive file Export resources to an archive file on the local file system. your archive V HelloWorld V X .classpath -🗹 🖹 .project >.settings 1 Bbin 1 Src The archive file should have the extension .zip Filter Types... Select All Deselect All Browse... To archive file: /Users/jjhursey/Desktop/HelloWorld-Assignment0.zip Ŧ Then click on Options Save in zip format Create directory structure for files Finish to create Save in tar format Create only selected directories Compress the contents of the file the file. ? < Back Next > Cancel Finish 1 September 2015

- Checking the Archived project before submission
 - Find the .zip file in your file system.
 - Decompress the archive (usually by double clicking on it).
 - Note: Windows users may need to use the "Extract all" button <u>http://windows.microsoft.com/en-us/windows-8/zip-unzip-files</u>
 - Check to make sure that the src directory contains all of the .java files that you want to submit.

What to submit for an assignment

- Submit the .zip file
- If you are using D2L make sure that the file is completely submitted before logging out.
 - Note that this often requires two different confirmation screens!
