Table of Contents

Foreword vii
1. A Quick Tour of the Foundations of Web Apps 1
    1. The World Wide Web (WWW) 1
    2. HTML and XML 1
        2.1. XML documents 1
        2.2. Unicode and UTF-8 2
        2.3. XML namespaces 2
        2.4. Correct XML documents 2
        2.5. The evolution of HTML 3
        2.6. HTML forms 4
    3. Styling Web Documents and User Interfaces with CSS 5
    4. JavaScript - "the assembly language of the Web" 6
        4.1. JavaScript as an object-oriented language 7
        4.2. Further reading about JavaScript 7
    5. Accessibility for Web Apps 7
2. More on JavaScript 8
    1. JavaScript Basics 8
        1.1. Types and data literals in JavaScript 8
        1.2. Variable scope 10
        1.3. Strict Mode 11
        1.4. Different kinds of objects 11
        1.5. Array lists 12
        1.6. Maps 13
        1.7. JavaScript supports four types of basic data structures 14
        1.8. Methods and Functions 15
        1.9. Defining and using classes 17
    2. Storing Database Tables with JavaScript's localStorage API 22
        2.1. Entity Tables 23
        2.2. JavaScript's LocalStorage API 23
3. Building a Minimal App with Plain JavaScript in Seven Steps 25
    1. Step 1 - Set up the Folder Structure 25
    2. Step 2 - Write the Model Code 26
        2.1. Representing the collection of all `Book` instances 27
        2.2. Creating a new `Book` instance 28
        2.3. Loading all `Book` instances 28
        2.4. Updating a `Book` instance 29
        2.5. Deleting a `Book` instance 29
        2.6. Saving all `Book` instances 29
        2.7. Creating test data 30
        2.8. Clearing all data 30
    3. Step 3 - Initialize the Application 30
    4. Step 5 - Implement the *Create* Use Case 31
    5. Step 4 - Implement the *Retrieve/List All* Use Case 32
    6. Step 6 - Implement the *Update* Use Case 33
    7. Step 7 - Implement the *Delete* Use Case 34
    8. Run the App and Get the Code 35
    9. Possible Variations and Extensions 35
        9.1. Using IndexedDB as an Alternative to LocalStorage 35
        9.2. Dealing with date/time information using `Date` and `<time>` 36
    10. Points of Attention 37

10.1. Database size and memory management 37
10.2. Code clarity 37
10.3. Boilerplate code 37
10.4. Architectural separation of concerns 38
11. Practice Projects 38
11.1. Develop a Plain JS Front-End App for Managing Movie Data 38
11.2. Managing Persistent Data with IndexedDB 39
Glossary 40

List of Figures

2.1. The built-in JavaScript classes `Object` and `Function`. 21
3.1. The object type `Book`. 25
3.2. The minimal app's start page `index.html`. 26
3.3. The object type `Movie`. 38
