LEARNING C Language

Free unaffiliated eBook created from
Stack Overflow contributors.

#C

Table of Contents

About.....	1
Chapter 1: Getting started with C Language.....	2
Remarks.....	2
Common Compilers.....	2
Compiler C version Support.....	2
Code style (off-topic here):.....	3
Libraries and APIs not covered by the C Standard (and therefore being off-topic here):.....	3
Versions.....	4
Examples.....	4
Hello World.....	4
hello.c.....	4
Let's look at this simple program line by line.....	4
Editing the program.....	5
Compiling and running the program.....	5
Compile using GCC.....	6
Using the clang compiler.....	6
Using the Microsoft C compiler from the command line.....	6
Executing the program.....	6
Original "Hello, World!" in K&R C.....	6
Chapter 2: — character classification & conversion.....	9
Examples.....	9
Classifying characters read from a stream.....	9
Classifying characters from a string.....	9
Introduction.....	10
Chapter 3: Aliasing and effective type.....	13
Remarks.....	13
Examples.....	14
Character types cannot be accessed through non-character types.....	14
Effective type.....	15
Violating the strict aliasing rules.....	15

restrict qualification	16
Changing bytes	17
Chapter 4: Arrays	19
Introduction	19
Syntax	19
Remarks	19
Examples	20
Declaring and initializing an array	20
Clearing array contents (zeroing)	21
Array length	22
Setting values in arrays	23
Define array and access array element	24
Allocate and zero-initialize an array with user defined size	24
Iterating through an array efficiently and row-major order	25
Multi-dimensional arrays	27
Iterating through an array using pointers	29
Passing multidimensional arrays to a function	30
See also	31
Chapter 5: Assertion	32
Introduction	32
Syntax	32
Parameters	32
Remarks	32
Examples	33
Precondition and Postcondition	33
Simple Assertion	34
Static Assertion	34
Assertion of Unreachable Code	35
Assert Error Messages	36
Chapter 6: Atomics	38
Syntax	38
Remarks	38

Examples.....	38
atomics and operators.....	38
Chapter 7: Bit-fields.....	40
Introduction.....	40
Syntax.....	40
Parameters.....	40
Remarks.....	40
Examples.....	40
Bit-fields.....	40
Using bit-fields as small integers.....	41
Bit-field alignment.....	42
When are bit-fields useful?.....	43
Don'ts for bit-fields.....	44
Chapter 8: Boolean.....	45
Remarks.....	45
Examples.....	45
Using stdbool.h.....	45
Using #define.....	45
Using the Intrinsic (built-in) Type _Bool.....	46
Integers and pointers in Boolean expressions.....	46
Defining a bool type using typedef.....	47
Chapter 9: Command-line arguments.....	49
Syntax.....	49
Parameters.....	49
Remarks.....	49
Examples.....	50
Printing the command line arguments.....	50
Print the arguments to a program and convert to integer values.....	50
Using GNU getopt tools.....	51
Chapter 10: Comments.....	55
Introduction.....	55
Syntax.....	55

Examples.....	55
/* */ delimited comments.....	55
// delimited comments.....	56
Commenting using the preprocessor.....	56
Possible pitfall due to trigraphs.....	57
Chapter 11: Common C programming idioms and developer practices.....	58
Examples.....	58
Comparing literal and variable.....	58
Do not leave the parameter list of a function blank — use void.....	58
Chapter 12: Common pitfalls.....	62
Introduction.....	62
Examples.....	62
Mixing signed and unsigned integers in arithmetic operations.....	62
Mistakenly writing = instead of == when comparing.....	62
Incautious use of semicolons.....	64
Forgetting to allocate one extra byte for \0.....	64
Forgetting to free memory (memory leaks).....	65
Copying too much.....	67
Forgetting to copy the return value of realloc into a temporary.....	67
Comparing floating point numbers.....	67
Doing extra scaling in pointer arithmetic.....	69
Macros are simple string replacements.....	70
Undefined reference errors when linking.....	72
Misunderstanding array decay.....	74
Passing unadjacent arrays to functions expecting "real" multidimensional arrays.....	76
Using character constants instead of string literals, and vice versa.....	78
Ignoring return values of library functions.....	78
Newline character is not consumed in typical scanf() call.....	79
Adding a semicolon to a #define.....	80
Multi-line comments cannot be nested.....	81
Overstepping array boundaries.....	83
Recursive function — missing out the base condition.....	83
Checking logical expression against 'true'.....	85
