# **Susy Documentation**

***Release 2.2.12***

**Miriam Eric Suzanne and contributors**

April 10, 2018

<b>1</b>	<b>Contents</b>	<b>3</b>
1.1	Getting Started . . . . .	3
1.2	Settings . . . . .	7
1.3	Shorthand . . . . .	20
1.4	Toolkit . . . . .	22
1.5	Susy One . . . . .	37
1.6	Upgrade Path . . . . .	48
1.7	DIY Susy . . . . .	53
1.8	Changelog . . . . .	57
<b>2</b>	<b>ToDo</b>	<b>71</b>

In a world of agile development and super-tablet-multi-magic-laptop-phones, the best layouts can't be contained in a single framework or technique. CSS Libraries are a bloated mess of opinions about how to do your job. Why let the table-saw tell you where to put the kitchen?

Your markup, your design, your opinions | *our math*.

---

**Note:** These docs are focused on Susy 2.2.12. See the [Susy One](#) documentation for help with earlier versions of Susy.
