#ruby-on-rails

Table of Contents

About ... 1

Chapter 1: Getting started with Ruby on Rails ... 2

- Remarks ... 2
- Versions ... 2
- Examples ... 3
  - Creating a Ruby on Rails Application ... 3
  - Create a new Rails app with your choice of database and including the RSpec Testing Tool ... 5
  - Generating A Controller ... 6
  - Generate a Resource with Scaffolds ... 6
  - Create a new Rails app with a non-standard database adapter ... 7
  - Creating Rails APIs in JSON ... 8
  - Installing Rails ... 9

Chapter 2: ActionCable ... 12

- Remarks ... 12
- Examples ... 12
  - [Basic] Server Side ... 12
  - [Basic] Client Side (Coffeescript) ... 12

app/assets/javascripts/channels/notifications.coffee ... 12

app/assets/javascripts/application.js # usually generated like this ... 12

app/assets/javascripts/cable.js # usually generated like this ... 13

- User Authentication ... 13

Chapter 3: ActionController ... 14

- Introduction ... 14
- Examples ... 14
  - Output JSON instead of HTML ... 14
  - Controllers (Basic) ... 14
  - Parameters ... 15
  - Filtering parameters (Basic) ... 15
  - Redirecting ... 16
  - Using Views ... 16

404 when record not found ... 18
Basic REST Controller ... 18
Display error pages for exceptions ... 19
Filters ... 20
Generating a controller ... 22
Rescuing ActiveRecord::RecordNotFound with redirect_to ... 23
Chapter 4: ActionMailer ... 25
Introduction ... 25
Remarks ... 25
Examples ... 25
Basic Mailer ... 25
user_mailer.rb ... 25
user.rb ... 25
approved.html.erb ... 26
approved.text.erb ... 26
Generating a new mailer ... 26
Adding Attachments ... 26
ActionMailer Callbacks ... 27
Generate a Scheduled Newsletter ... 27
ActionMailer Interceptor ... 34
Chapter 5: Active Jobs ... 36
Examples ... 36
Introduction ... 36
Sample Job ... 36
Creating an Active Job via the generator ... 36
Chapter 6: Active Model Serializers ... 37
Introduction ... 37
Examples ... 37
Using a serializer ... 37
Chapter 7: ActiveJob ... 38
Introduction ... 38

Examples 38
Create the Job 38
Enqueue the Job 38
Chapter 8: ActiveModel 39
Remarks 39
Examples 39
Using ActiveModel::Validations 39
Chapter 9: ActiveRecord 40
Examples 40
Creating a Model manually 40
Creating a Model via generator 40
Creating A Migration 41
Add/remove fields in existing tables 41
Create a table 41
Create a join table 42
Precedence 42
Introduction to Callbacks 43
Create a Join Table using Migrations 44
Manually Testing Your Models 44
Using a model instance to update a row 45
Chapter 10: ActiveRecord Associations 46
Examples 46
belongs_to 46
has_one 46
has_many 47
Polymorphic association 47
The has_many :through association 48
The has_one :through association 48
The has_and_belongs_to_many association 48
Self-Referential Association 49
Chapter 11: ActiveRecord Locking 50

Examples ... 50
Optimistic Locking ... 50
Pessimistic Locking ... 50
Chapter 12: ActiveRecord Migrations ... 51
Parameters ... 51
Remarks ... 51
Examples ... 51
Run specific migration ... 51
Create a join table ... 52
Running migrations in different environments ... 52
Add a new column to a table ... 53
Add a new column with an index ... 53
Remove an existing column from a table ... 53
Add a reference column to a table ... 54
Create a new table ... 54
Adding multiple columns to a table ... 55
Running migrations ... 55
Rollback migrations ... 56
Rollback the last 3 migrations ... 56
Rollback all migrations ... 56
Changing Tables ... 56
Add an unique column to a table ... 57
Change an existing column’s type ... 57
A longer but safer method ... 57
Redo migrations ... 58
Add column with default value ... 58
Forbid null values ... 59
Checking migration status ... 59
Create a hstore column ... 59
Add a self reference ... 60
Create an array column ... 60
Adding a NOT NULL constraint to existing data ... 60
Chapter 13: ActiveRecord Query Interface ... 62
