Table of Contents

About.....	1
Chapter 1: Getting started with Django.....	2
Remarks.....	2
Versions.....	2
Examples.....	3
Starting a Project.....	3
Django Concepts.....	5
A complete hello world example.....	6
Virtual Environment.....	7
Python 3.3+.....	7
Python 2.....	7
Activate (any version).....	7
Alternatively: use virtualenvwrapper.....	8
Alternatively: use pyenv + pyenv-virtualenv.....	8
Set your Project Path.....	9
Single File Hello World Example.....	9
Deployment friendly Project with Docker support.....	10
Project Structure.....	10
Dockerfile.....	11
Compose.....	11
Nginx.....	12
Usage.....	12
Chapter 2: Administration.....	14
Examples.....	14
Change list.....	14
Additional CSS styles and JS scripts for admin page.....	15
Dealing with foreign keys referencing large tables.....	16
views.py.....	17
urls.py.....	17

forms.py	17
admin.py	18
Chapter 3: ArrayField - a PostgreSQL-specific field	19
Syntax	19
Remarks	19
Examples	19
A basic ArrayField	19
Specifying the maximum size of an ArrayField	19
Querying for membership of ArrayField with contains	20
Nesting ArrayFields	20
Querying for all models who contain any item in a list with contained_by	20
Chapter 4: Async Tasks (Celery)	21
Remarks	21
Examples	21
Simple example to add 2 numbers	21
Chapter 5: Authentication Backends	23
Examples	23
Email Authentication Backend	23
Chapter 6: Class based views	24
Remarks	24
Examples	24
Class Based Views	24
views.py	24
urls.py	24
Context data	24
views.py	25
book.html	25
List and Details views	25
app/models.py	25
app/views.py	25
app/templates/app/pokemon_list.html	26

app/templates/app/pokemon_detail.html.....	26
app/urls.py.....	26
Form and object creation.....	27
app/views.py.....	27
app/templates/app/pokemon_form.html (extract).....	27
app/templates/app/pokemon_confirm_delete.html (extract).....	28
app/models.py.....	28
Minimal example.....	29
Django Class Based Views: Example of CreateView.....	29
One View, Multiple Forms.....	30
Chapter 7: Context Processors.....	32
Remarks.....	32
Examples.....	32
Use a context processor to access settings.DEBUG in templates.....	32
Using a context processor to access your most recent blog entries in all templates.....	32
Extending your templates.....	34
Chapter 8: Continuous Integration With Jenkins.....	35
Examples.....	35
Jenkins 2.0+ Pipeline Script.....	35
Jenkins 2.0+ Pipeline Script, Docker Containers.....	35
Chapter 9: CRUD in Django.....	37
Examples.....	37
Simplest CRUD example.....	37
Chapter 10: Custom Managers and Querysets.....	42
Examples.....	42
Defining a basic manager using Querysets and `as_manager` method.....	42
select_related for all queries.....	43
Define custom managers.....	43
Chapter 11: Database Routers.....	45
Examples.....	45
Adding a Database Routing file.....	45

Specifying different databases in code	46
Chapter 12: Database Setup	47
Examples	47
MySQL / MariaDB	47
PostgreSQL	48
sqlite	49
Fixtures	49
Django Cassandra Engine	50
Chapter 13: Database transactions	52
Examples	52
Atomic transactions	52
Problem	52
Solution	52
Chapter 14: Debugging	54
Remarks	54
Examples	54
Using Python Debugger (Pdb)	54
Using Django Debug Toolbar	55
Using "assert False"	57
Consider Writing More Documentation, Tests, Logging and Assertions Instead of Using a Debu	57
Chapter 15: Deployment	58
Examples	58
Running Django application with Gunicorn	58
Deploying with Heroku	58
Simple remote deploy fabfile.py	59
Using Heroku Django Starter Template	60
Django deployment instructions. Nginx + Gunicorn + Supervisor on Linux (Ubuntu)	60
NGINX	61
GUNICORN	62
SUPERVISOR	62
Deploying locally without setting up apache/nginx	63
Chapter 16: Django and Social Networks	64
