

MapServer
open source web mapping

MapServer Documentation

Release 7.0.7

The MapServer Team

2017-11-15

1	Introduction	2
1.1	An Introduction to MapServer	2
1.1.1	MapServer Overview	3
1.1.2	Anatomy of a MapServer Application	4
1.1.3	Installation and Requirements	6
	Hardware Requirements	6
	Software Requirements	6
	Skills	6
	Windows Installation	7
1.1.4	Introduction to the Mapfile	14
	MAP Object	16
	LAYER Object	16
	CLASS and STYLE Objects	17
	SYMBOLs	18
	LABEL	19
	CLASS Expressions	22
	INCLUDE	22
	Get MapServer Running	23
	Get Demo Running	23
1.1.5	Making the Site Your Own	24
	Adding Data to Your Site	24
	Vector Data	24
	Raster Data	24
	Projections	24
1.1.6	Enhancing your site	25
	Adding Query Capability	25
	Attribute queries	25
	Spatial queries	25
	Interfaces	25
	Data Optimization	25
1.1.7	How do I get Help?	26
	Documentation	26
	Users Mailing List	26
	IRC	26
	Reporting bugs	26
	Tutorial	26
	Test Suite	27
	Books	27

2	Tutorial	28
2.1	MapServer Tutorial	28
2.1.1	Tutorial background	28
	Tutorial Timeframe	28
	Tutorial Data	28
	Before Using the Tutorial	29
	Windows, UNIX/Linux Issues	29
	Other Resources	30
2.1.2	Section 1: Static Maps and the MapFile	30
2.1.3	Section 2: CGI variables and the User Interface	31
	HTML Templates	31
	Examples	31
2.1.4	Section 3: Query and more about HTML Templates	31
2.1.5	Section 4: Advanced User Interfaces	32
3	Installation	33
3.1	Installation	33
3.1.1	Compiling on Unix	33
	Introduction	33
	Obtaining the necessary software	34
	Anti-Grain Geometry Support	35
	OGC Support	35
	Spatial Warehousing	37
	Compiling	38
	Installation	39
3.1.2	Compiling on Win32	41
	Introduction	41
	Compiling	42
	Set up a Project Directory	42
	Download MapServer Source Code and Supporting Libraries	42
	The MapServer source code	43
	Set Compilation Options	44
	Compile the Libraries	45
	Compile MapServer	45
	Compiling MapServer with PostGIS support	46
	Common Compiling Errors	46
	Installation	47
	Other Helpful Information	47
	Acknowledgements	47
3.1.3	PHP MapScript Installation	47
	Introduction	48
	Obtaining, Compiling, and Installing PHP and the PHP/MapScript Module	49
	FAQ / Common Problems	52
3.1.4	.NET MapScript Compilation	54
	Compilation	54
	Installation	56
	Known issues	57
	Most frequent errors	59
	Bug reports	59
3.1.5	IIS Setup for MapServer	59
	MapServer Setup	60
	Configuring with IIS	61
	Setting up Applications	63
	Setting up Logging	64

	Troubleshooting	64
3.1.6	Oracle Installation	65
	Preface	66
	System Assumptions	66
	Compile MapServer	67
	Set Environment Variables	67
3.1.7	V8 MapScript Support	69
	Introduction	69
	Obtaining, Compiling, and Installing V8 and V8/MapScript	70
4	Mapfile	72
4.1	Mapfile	72
4.1.1	Cartographical Symbol Construction with MapServer	72
	Abstract	74
	Introduction	74
	Using Cartographical Symbols in MapServer	77
	Construction of Point Symbols	78
	Construction of Line Symbols	85
	Area Symbols	97
	Examples (MapServer 4)	113
	Tricks	119
	Mapfile changes related to symbols	123
	Current Problems / Open Issues	123
	The End	124
4.1.2	CLASS	124
4.1.3	CLUSTER	126
	Description	127
	Supported Layer Types	127
	Mapfile Parameters	127
	Supported Processing Options	127
	Mapfile Snippet	127
	Feature attributes	128
	Handling GetFeatureInfo	128
	PHP MapScript Usage	129
	Example: Clustering Railway Stations	129
4.1.4	COMPOSITE	131
	Background	131
	Parameters	131
	Usage	132
4.1.5	Display of International Characters in MapServer	133
	Credit	133
	Related Links	134
	Requirements	134
	How to Enable in Your Mapfile (MapServer >= 7.0)	134
	How to Enable in Your Mapfile (MapServer < 7.0)	136
	Example Using PHP MapScript	137
	Notes	138
4.1.6	Expressions	138
	Introduction	139
	Expression Types	140
	String comparison (equality)	140
	Regular expression comparison	141
	List expressions	142
	“MapServer expressions”	143

4.1.7	FEATURE	149
4.1.8	FONTSET	150
	Format of the fontset file	150
4.1.9	GEOMTRANSFORM - Geometry Transformations	151
	Transformations for simple styling (<i>CLASS STYLE</i> only)	153
	Labels (<i>LABEL STYLE</i> only)	157
	Expressions and advanced transformations (<i>LAYER</i> and <i>CLASS STYLE</i>)	159
	Javascript transformation	167
4.1.10	GRID	172
	Description	172
	Mapfile Parameters:	172
	Example1: Grid Displaying Degrees	172
	Example2: Grid Displaying Degrees with Symbol	173
	Example3: Grid Displayed in Other Projection (Google Mercator)	174
4.1.11	INCLUDE	175
	Notes	176
	Example	176
4.1.12	JOIN	177
	Description	177
	Supported Formats	177
	Mapfile Parameters:	177
	Example 1: Join from Shape dataset to DBF file	178
	Example 2: Join from Shape dataset to PostgreSQL table	179
	Example 3: Join from Shape dataset to CSV file	180
	Example 4: Join from Shape dataset to MySQL	182
	Example 5: One-to-many join	182
4.1.13	LABEL	183
4.1.14	LAYER	190
4.1.15	LEADER	204
	Description	204
	Supported Layer Types	204
	Mapfile Parameters	204
	Mapfile Snippet	204
	Example: World Countries Labels	205
4.1.16	LEGEND	208
4.1.17	MAP	209
4.1.18	OUTPUTFORMAT	214
4.1.19	PROJECTION	218
	Background	218
	Projections with MapServer	218
	“Web Mercator” or “Google Mercator”	219
	PROJECTION AUTO	219
	Specifying which EPSG files to use	219
	Important Notes	220
	For More Information	220
4.1.20	QUERYMAP	220
4.1.21	REFERENCE	221
4.1.22	SCALEBAR	222
4.1.23	STYLE	223
4.1.24	STYLEITEM Javascript	232
	Introduction	232
	Usage	232
	Example 1. Single STYLE definition	233
	Example 2. CLASS with multiple STYLE definitions	233
