Table of Contents

Introduction	1.1
Unit 1. Get Started	1.2
Lesson 1: Build Your First App	1.2.1
1.1: Install Android Studio and Run Hello World	1.2.1.1
1.2A: Make Your First Interactive UI	1.2.1.2
1.2B: Using Layouts	1.2.1.3
1.3: Working with TextView Elements	1.2.1.4
1.4: Learning About Available Resources	1.2.1.5
Lesson 2: Activities	1.2.2
2.1: Create and Start Activities	1.2.2.1
2.2: Activity Lifecycle and State	1.2.2.2
2.3: Activities and Implicit Intents	1.2.2.3
Lesson 3: Testing, Debugging, and Using Support Libraries	1.2.3
3.1: Using the Debugger	1.2.3.1
3.2: Testing your App	1.2.3.2
3.3: Using Support Libraries	1.2.3.3
Unit 2. User Experience	1.3
Lesson 4: User Interaction	1.3.1
4.1: Using Keyboards, Input Controls, Alerts, and Pickers	1.3.1.1
4.2: Using an Options Menu and Radio Buttons	1.3.1.2
4.3: Using the App Bar and Tabs for Navigation	1.3.1.3
4.4: Creating a RecyclerView	1.3.1.4
Lesson 5: Delightful User Experience	1.3.2
5.1: Drawables, Styles, and Themes	1.3.2.1
5.2: Material Design: Lists, Cards, and Colors	1.3.2.2
5.3: Supporting Landscape, Multiple Screen Sizes, and Localization	1.3.2.3
Lesson 6: Testing your UI	1.3.3
6.1: Using Espresso to Test Your UI	1.3.3.1
Unit 3. Working in the Background	1.4
Lesson 7: Background Tasks	1.4.1
7.1: Create an AsyncTask	1.4.1.1
7.2: Connect to the Internet with AsyncTask and AsyncTaskLoader	1.4.1.2
7.3: Broadcast Receivers	1.4.1.3
Lesson 8: Triggering, Scheduling, and Optimizing Background Tasks	1.4.2
8.1: Notifications	1.4.2.1
8.2: Alarm Manager	1.4.2.2
8.3: Job Scheduler	1.4.2.3
Unit 4. All About Data	1.5
Lesson 9: Preferences and Settings	1.5.1

9.1: Shared Preferences	1.5.1.1
9.2: Adding Settings to an App	1.5.1.2
Lesson 10: Storing Data Using SQLite	1.5.2
10.1A: SQLite Database	1.5.2.1
10.1B: Searching a SQLite Database	1.5.2.2
Lesson 11: Sharing Data with Content Providers	1.5.3
11.1A: Implementing a Minimalist Content Provider	1.5.3.1
11.1B: Adding a Content Provider to Your Database	1.5.3.2
11.1C: Sharing Content with Other Apps	1.5.3.3
Lesson 12: Loading Data Using Loaders	1.5.4
12.1: Loading and Displaying Fetched Data	1.5.4.1
Appendix: Homework	1.6
Homework Lesson 1	1.6.1
Homework Lesson 2	1.6.2
Homework Lessons 3, 4	1.6.3
Homework Lessons 5, 6	1.6.4
Homework Lessons 7, 8	1.6.5
Homework Lessons 9, 10, 11	1.6.6
Appendix: Utilities	1.7

Android Developer Fundamentals Course – Practicals

[Android Developer Fundamentals](#) is a training course created by the Google Developer Training team. You learn basic Android programming concepts and build a variety of apps, starting with Hello World and working your way up to apps that use content providers and loaders.

Android Developer Fundamentals prepares you to take the exam for the [Associate Android Developer Certification](#).

This course is intended to be taught in a classroom, but all the materials are online, so if you like to learn by yourself, go ahead!

Prerequisites

Android Developer Fundamentals is intended for new and experienced developers who already have Java programming experience and now want to learn to build Android apps.

Course materials

The course materials include:

- This practical workbook, which guides you through creating Android apps to practice and perfect the skills you're learning
- A concept reference: [Android Developer Fundamentals Course—Concepts](#)
- [Slide decks](#) (for optional use by instructors)
- [Videos of lectures](#) (for reference by instructors and students)

What topics are covered?

Android Developer Fundamentals includes five teaching units, which are described in [What does the course cover?](#)
