# REST API Developer Guide

Version 56.0, Spring '23

# CONTENTS

<b>Chapter 1: Introduction to REST API</b> .....	<b>1</b>
What Is REST API? .....	<b>2</b>
API Compatible Editions and Development Environments .....	<b>2</b>
REST Resources and Requests .....	<b>3</b>
REST API Architecture .....	<b>4</b>
Authorization Through Connected Apps and OAuth 2.0 .....	<b>6</b>
Headers .....	<b>6</b>
Assignment Rule Header .....	<b>7</b>
Call Options Header .....	<b>8</b>
Compression Headers .....	<b>8</b>
Conditional Request Headers .....	<b>9</b>
Duplicate Rule Header .....	<b>11</b>
Limit Info Header .....	<b>11</b>
Package Version Header .....	<b>12</b>
Query Options Header .....	<b>12</b>
Warning Header .....	<b>13</b>
Send REST Requests with cURL .....	<b>13</b>
Configure Salesforce CORS Allowlist .....	<b>14</b>
Valid Date and DateTime Formats .....	<b>15</b>
Status Codes and Error Responses .....	<b>16</b>
API End-of-Life .....	<b>17</b>
<b>Chapter 2: Quick Start</b> .....	<b>18</b>
Using cURL .....	<b>19</b>
Step One: Sign up for Salesforce Developer Edition .....	<b>19</b>
Step Two: Set Up Authentication .....	<b>20</b>
Step Three: Walk Through the Sample Code .....	<b>22</b>
Using Other Tools .....	<b>26</b>
<b>Chapter 3: Examples</b> .....	<b>27</b>
Getting Information About My Organization .....	<b>28</b>
List Available REST API Versions .....	<b>28</b>
List Org Limits .....	<b>29</b>
List Available REST Resources .....	<b>33</b>
Get a List of Objects .....	<b>36</b>
Get a List of Objects If Metadata Has Changed .....	<b>37</b>
Working with Object Metadata .....	<b>37</b>
Retrieve Metadata for an Object .....	<b>37</b>
Get Field and Other Metadata for an Object .....	<b>38</b>

## Contents

Get Object Metadata Changes . . . . .	39
Working with Records . . . . .	40
Create a Record . . . . .	41
Update a Record . . . . .	41
Delete a Record . . . . .	43
Get Field Values from a Standard Object Record . . . . .	43
Get Field Values from an External Object Record by Using the Salesforce ID . . . . .	44
Get Field Values from an External Object Record by Using the External ID Standard Field . . . . .	44
Retrieve a Record Using an External ID . . . . .	45
Insert or Update (Upsert) a Record Using an External ID . . . . .	45
Traverse Relationships with Friendly URLs . . . . .	49
Get a List of Deleted Records Within a Given Timeframe . . . . .	55
Get a List of Updated Records Within a Given Timeframe . . . . .	56
Delete Lightning Experience Event Series . . . . .	56
Working with Searches and Queries . . . . .	57
Execute a SOQL Query . . . . .	58
Execute a SOQL Query that Includes Deleted Items . . . . .	59
Get Feedback on Query Performance (Beta) . . . . .	60
Search for a String . . . . .	61
Get the Default Search Scope and Order . . . . .	64
Get Search Result Layouts for Objects . . . . .	65
View Relevant Items . . . . .	67
Get an Image from a Rich Text Area Field . . . . .	69
Insert or Update Blob Data . . . . .	70
Retrieve Blob Data . . . . .	76
Working with Recently Viewed Information . . . . .	77
View Recently Viewed Records . . . . .	77
Mark Records as Recently Viewed . . . . .	78
Managing User Passwords . . . . .	78
Manage User Passwords . . . . .	79
Working with Approval Processes and Process Rules . . . . .	80
Get a List of All Approval Processes . . . . .	81
Submit a Record for Approval . . . . .	81
Approve a Record . . . . .	82
Reject a Record . . . . .	83
Bulk Approvals . . . . .	83
Get a List of Process Rules . . . . .	84
Get a Particular Process Rule . . . . .	85
Trigger Process Rules . . . . .	86
Using Event Monitoring . . . . .	86
Describe Event Monitoring Using REST . . . . .	87
Query Event Monitoring Data with REST . . . . .	88
Get Event Monitoring Content from a Record . . . . .	89

## Contents

Download Large Event Log Files Using cURL with REST	90
Delete Event Monitoring Data	90
Query or View Hourly Event Log Files	91
Using Composite Resources	93
Execute Dependent Requests in a Single API Call	94
Update an Account, Create a Contact, and Link Them with a Junction Object	96
Update a Record and Get Its Field Values in a Single Request	98
Upsert an Account and Create a Contact	99
Create Nested Records	100
Create Multiple Records	102
Using Composite Graphs	103
Using a Composite Graph	109
allOrNone Parameters in Composite and Collections Requests	113
<b>Chapter 4: Generating an OpenAPI 3.0 Document for sObjects REST API (Beta)</b>	<b>117</b>
<b>Chapter 5: Reference</b>	<b>122</b>
Versions	131
Resources by Version	131
Limits	132
Describe Global	136
sObject Basic Information	137
Retrieve Object Metadata Using sObject Basic Information	137
Create Records Using sObject Basic Information	138
sObject Describe	139
sObject Get Deleted	140
sObject Get Updated	142
sObject Named Layouts	143
sObject Rows	144
Get Records Using sObject Rows	144
Update Records Using sObject Rows	146
Delete Records Using sObject Rows	147
sObject Rows by External ID	149
Get Records Using sObject Rows by External ID	149
Create Records Using sObject Rows by External ID	150
Upsert Records Using sObject Rows by External ID	151
Delete Records Using sObject Rows by External ID	152
Return Headers Using sObject Rows by External ID	153
sObject Blob Retrieve	153
sObject ApprovalLayouts	154
Get Approval Layouts	154
Return Headers for Approval Layouts	155
sObject Single Approval Process	156
Get a Layout for a Single Approval Process on a Specified Object	156
